Personal Profile

I have always been a dedicated professional being extremely organized and a fast learner. My interpersonal and organizational skills have always yield superior results for the companies. I am someone that embraces the company culture and, I am good team player.

I am on a self-funded IT Training course now and looking for an opportunity now in Tech, as a Junior Developer, where I think my skills could be valuable. I learned some programming languages and loved the experience so far but feel the need of mentoring and a project or goal to apply this learning on. I have been working with Html, CSS, JavaScript also C# and Asp.Net MVC specially, which I have enjoyed more.

I am looking for a role that will allow me to learn from the ground up and build a career in this industry and willing to apply myself 100% in this new opportunity.

Interests and Achievements

Hobbies: I love to travel to learn history and better understand how the cultures around the world vary, also it is a great opportunity to spend time with family and friends, when I am not travelling I like being outdoors, I find being outside is a great way to de-stress.
